

Precision Medicine Solutions for Pharmacies

The **SinguLab® Pharmacy Program** leverages the industry's leading pharmacogenomic panel to help differentiate your pharmacy offering while **adding value to your business:**

Improve facility and resident care

Deliver actionable genomic-based medication risk management reporting, ensuring the prescription of safer and more effective medications.

Differentiate your business

Provide a personalized medication management program to ensure your entire resident base is continuously monitored for potential drug-to-gene interactions.

Easy to start

Integrates within your current pharmacy management software system as well as your facility's EHR system, resulting in a smooth adoption.
